REPORT

RE: Product "Relax Me" (Calmer)

From 03/10/11 to 28/10/11, the horse "Quainton Covergirl" was administered 50 g of Relax Me daily for the said period. A clotted sample (lab no. 11M18181) was then taken from that animal and sent to Laboratoire des Courses Hippiques for testing for prohibitive substances.

The results show that there were no prohibited substances found.

Signed:

Professor Thomas C. Buckley, MSc, FIBMS, FAMLS,
Head of Microbiology.
